

MANAGEMENT DISCUSSION & ANALYSIS
For the period ended April 30, 2016

Directors and Officers as at July 22, 2016:

Directors:

Gary Arca
Robert Eadie
Jordan Estra
David R. Gunning
Michael Gunning
Cory Kent
Ken Sumanik
Federico Villaseñor

Officers:

Executive Chairman, Chief Executive Officer & President – Robert Eadie
Chief Financial Officer – Gary Arca
Chief Operating Officer – Dave Gunning
Corporate Secretary – Cory Kent

Contact Name: Gary Arca
Contact e-mail address: garca@starcore.com
TSX Symbol: SAM

Form 51-102-F1

STARCORE INTERNATIONAL MINES LTD.

MANAGEMENT DISCUSSION & ANALYSIS

For the period ended April 30, 2016

1. Date of This Report

This MD&A is prepared as of July 22, 2016.

This Management Discussion and Analysis (“MD&A”) should be read in conjunction with the audited consolidated financial statements of Starcore International Mines Ltd. (“Starcore”, or the “Company”) for the period ended April 30, 2016.

On May 13, 2016, the Company changed its fiscal year end from July 31 to April 30. With this year-end change, the Company will report a one-time transitional period for the nine months ended April 30, 2016. Due to the difference in period lengths, the Statement of Operations and Comprehensive income and statement of cash flows is not directly comparable.

Monetary amounts throughout this MD&A are shown in thousands of Canadian dollars, unless otherwise stated.

This MD&A includes certain statements that may be deemed “forward-looking statements”. Such statements and information include without limitation: statements regarding timing and amounts of capital expenditures and other assumptions; estimates of future reserves, resources, mineral production and sales; estimates of mine life; estimates of future mining costs, cash costs, minesite costs and other expenses; estimates of future capital expenditures and other cash needs, and expectations as to the funding thereof; statements and information as to the projected development of certain ore deposits, including estimates of exploration, development and production and other capital costs, and estimates of the timing of such exploration, development and production or decisions with respect to such exploration, development and production; estimates of reserves and resources, and statements and information regarding anticipated future exploration; the anticipated timing of events with respect to the Company’s minesite and; statements and information regarding the sufficiency of the Company’s cash resources. Such statements and information reflect the Company’s views as at the date of this document and are subject to certain risks, uncertainties and assumptions, and undue reliance should not be placed on such statements and information. Many factors, known and unknown could cause the actual results to be materially different from those expressed or implied by such forward looking statements and information. Such risks include, but are not limited to: the volatility of prices of gold and other metals; uncertainty of mineral reserves, mineral resources, mineral grades and mineral recovery estimates; uncertainty of future production, capital expenditures, and other costs; currency fluctuations; financing of additional capital requirements; cost of exploration and development programs; mining risks, risks associated with foreign operations; risks related to title issues; governmental and environmental regulation; and the volatility of the Company’s stock price. Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements.

2. Overall Performance

Description of Business

Starcore is engaged in exploring, extracting and processing gold and silver through its wholly-owned subsidiaries, Compañía Minera Peña de Bernal, S.A. de C.V. (“Bernal”), which owns the San Martin mine in Queretaro, Mexico and Altiplano GoldSilver S.A. de C.V (“Altiplano”), which owns the gold and silver processing plant in Matehuala, Mexico. The Company is a public reporting issuer on the Toronto Stock Exchange (“TSX”). The Company is also engaged in acquiring mining related operating assets and exploration assets in North America directly and through corporate acquisitions. The Company has interests in properties which are exclusively located in Mexico, USA and Canada.

Financial Highlights for period ending April 30, 2016 (audited) compared to the year ended July 31, 2015 (audited) and period ended April 30, 2015 (unaudited):

- Cash and short-term investments on hand is \$10 million at April 30, 2016 compared to \$6 million at July 31, 2015;
- Gold and silver sales of \$20.3 million for the nine months ended April 30, 2016 compared to \$21.7 million for the nine months ended April 30, 2015, a decrease of 6%;
- Net income of \$0.2 million for the period ended April 30, 2016 compared to net income of \$0.3 million for the nine months ended April 30, 2015;
- Equivalent gold production of 13,215 ounces in period ended April 30, 2016 compared to production of 14,941 ounces in period ended April 30, 2015, a decrease of 11%;
- Mine operating cash cost is US\$846/EqOz for the period ended April 30, 2016 compared to cost of US\$920/EqOz for the period ended April 30, 2015, a decrease of 8%;
- All-in sustaining costs of US\$1,146/EqOz for the period ended April 30, 2016 compared to costs of US\$1,080/EqOz for the period ended April 30, 2015, an increase of 6%;
- EBITDA⁽¹⁾ of \$2,747 for the period ended April 30, 2016 compared to \$4,429 for the nine months ended April 30, 2015, an decrease of 38%.

Reconciliation of Net income to EBITDA

For the period ending April 30, (Unaudited)	2016	2015
Net income (loss)	\$ 195	\$ 306
Income tax recovery	(2,639)	(1,049)
Interest	387	-
Depreciation and depletion	4,784	5,172
EBITDA	\$ 2,727	\$ 4,429
EBITDA MARGIN⁽²⁾	13.4%	20.1%

(1) EBITDA (“Earnings before Interest, Taxes, Depreciation and Amortization”) is a non-GAAP financial performance measure with no standard definition under IFRS. It is therefore possible that this measure could not be comparable with a similar measure of another Corporation. The Corporation uses this non-GAAP measure which can also be helpful to investors as it provides a result which can be compared with the Corporation market share price.

(2) EBITDA MARGIN is a measurement of a company’s operating profitability calculated as EBITDA divided by total revenue. EBITDA MARGIN is a non-GAAP financial performance measure with no standard definition under IFRS. It is therefore possible that this measure could not be comparable with a similar measure of another Corporation. The Corporation uses this non-GAAP measure which can also be helpful to investors as it provides a result which can be compared with the Corporation market share price.

Recent News

Exploration Drilling on Toiyabe property

On July 13th, 2016, the Company announced commencement of drilling on its Toiyabe Project, located 10 kilometers south of the Cortez Hills Mine in northeastern Nevada. Reverse Circulation (RC) drilling began on May 24, 2016 and core drilling on June 20th, 2016. Six RC holes were completed including two pre-collar holes for core drilling. The core rig is drilling its first hole. Total footage drilled to July 13th was 1,482 meters. Geochemical results are pending.

The drilling program will target Pipeline/Cortez Hills/Gold Rush style gold mineralization associated with CSMT resistivity highs, extensions of deep gold intercepts on Section 900 North associated with the 805 Fault, extensions of the near surface resource associated with the Courtney A and B faults, and gold anomalies associated with surface sampling or historic drilling. Previous drilling of the 805 Fault included T-0902C which averaged 3.62 g/t over 9.0 meters true width from 267 to 282 meters. Included within this interval is 0.9 meters true width of 16.19 g/t. The 2016 program will consist of 5,486 meters of RC and 1,219 meters of core drilling in 23 holes.

All RC drilling samples are collected in 1.5-meter intervals, logged and securely shipped to ALS Chemex Labs Inc. in Reno, Nevada to be analyzed for gold and silver by fire assay. A second sample split is kept on site for possible re-testing or future metallurgy. Standards and blanks are included with the sample submittals and numerous repeat assays conducted. The core is logged, sample intervals marked on the core either in five-foot lengths or geologic/structural breaks, sawed and half core assayed the same as the RC procedure mentioned above.

San Martin Mine Drill Update

The Company is pleased to announce that mining crews arrived at the 31-79 drill hole intersection at its San Martin Mine in Queretaro, Mexico. The Company has confirmed the existence of the intersection in drill hole 31-79 reported in its news release dated May 11, 2016. Drifting along the drill hole defined a 2-meter thick segment of manto mineralization bounded by steep faults on the north and south and a horizontal fault above. Subsequent exploration in the area has defined a 3-meter thick piece of mineralization above the flat fault displaced roughly 15 meters to the east.

In May of 2016, 536 tons were mined from the west block with an average grade of 11.47 g/t Au and 76 g/t Ag. In June, the east (upper) block was explored by drifting and raising and through June 20th, a total of 986 tons have been produced at 8.92g/t Au and 67 g/t Ag. Geologists estimate that 1500 tons remain to be extracted from this zone at similar grades.

The assay results are the average of muck samples from the mine lab results. Sample results are balanced each month end with the doré bars produced in the plant.

Drill hole 31-92 was recently completed to test the small remaining segment between these blocks and the previously mined stope to the north. This hole has returned a 9.1-meter interval grading 50.7 g/t gold and 115 g/t silver. This hole appears to have located another of these fault bounded ore segments.

“This new area, although relatively small, gives us the opportunity to understand the nature of the mineralization in the northern part of the mine which was extracted prior to Starcore purchasing the mine. We expect this perception to aid us in our endeavours to expand reserves and resources to the north.” Said Robert Eadie, President and CEO of the Company.

Fatality at its San Martin Mine

On June 22nd, 2016, the Company regretfully reported the fatality of an employee that occurred at the San Martin Mine in Queretaro, Mexico.

“We are deeply saddened over the loss of our colleague, an experienced underground miner at our San Martin Mine,” said Robert Eadie, President & Chief Executive Officer of the Company, who flew to Mexico upon hearing of the fatal accident. “Work-related losses are tragic and felt grievously by Starcore and our communities, and we extend our deepest sympathies to our colleague’s family and friends. The safety of our employees is of utmost importance for Starcore and we will continue to take every measure to eliminate all workplace accidents and ensure the workplace is safe for everyone.”

The accident was an isolated incident that occurred during wall and ceiling ground support installation in a cut-and-fill stope in the mine’s San Martin area. Starcore is working with the local authorities on completing a final report on their investigation. Operations at the mine outside of this stope continue and all crews have been fully debriefed on the accident. In the meantime, the plant is operating normally.

Appointment of New Auditors

The Company reports that it has appointed Davidson & Company LLP, Chartered Professional Accountants, as auditors of the Company for the new April 30th, 2016 year-end. The appointment follows the resignation of the former auditors, Deloitte LLP, Chartered Professional Accountants, at the request of the Company. The Company reports that there have been no reservations in the report of Deloitte LLP for the audits of the most recently completed fiscal period and, in the opinion of the Company, prior to the appointment of Davidson & Company LLP, there were no reportable events.

Starcore Announces Pre-production Results from Altiplano Plant

The Company reported its pre-production results from the Altiplano Plant located in Matehuala, Mexico. The Company previously reported that it had poured its first doré bar, weighing in at 21.131 kg., from purchased precipitates. Since then, the plant has been receiving concentrate deliveries to test the full facilities of the plant and procedures. To date, the Company has processed over 90 tonnes of concentrate purchased from 3 different suppliers to produce 40.16 kg of metal doré bars, which included 2.01kg of gold and 38.15kg of silver.

“We have proven the ability to process various types of concentrate and expect to do this profitably with a consistent supply of concentrates and production,” said Robert Eadie, President of the Company. “Having tested concentrates received from 14 different suppliers, we are currently negotiating concentrate purchase agreements for the best quality concentrate that will bring a consistent supply. As stated before, we see the Altiplano Plant as a synergistic cash-flow producing arm of the Company, growing our asset base for our shareholders.”

The doré bars were shipped to a refinery and sold at spot rates for gold and silver at the time of shipment. All proceeds of sales have been capitalized to the development costs of the facility, in accordance with accounting standards, until such time as Altiplano is receiving consistent supply of concentrates and is achieving consistent operating results.

3. Selected Annual Information

The highlights of financial data for the Company for the three most recently completed financial years are as follows:

	April 30, 2016		July 31, 2015		July 31, 2014
Revenues	\$ 20,326	\$	28,405	\$	33,136
Cost of Sales	(18,807)		(27,760)		(24,548)
Earnings from mining operations	1,519		645		8,588
Administrative Expenses	(3,963)		(2,355)		(3,557)
Income tax (expense) recovery	2,639		1,920		(2,066)
Total earnings					
(i) Total earnings	\$ 195	\$	210	\$	2,965
(ii) Earnings per share – basic	\$ 0.00	\$	0.00	\$	0.02
(iii) Earnings per share – diluted	\$ 0.00	\$	0.00	\$	0.02
Total assets	\$ 78,907	\$	69,197	\$	65,094
Total long-term liabilities	\$ 13,324	\$	15,141	\$	14,295

4. Results of Operations

Discussion of Acquisitions, Operations and Financial Condition

The following should be read in conjunction with the audited consolidated financial statements of the Company and notes attached thereto for the period ended April 30, 2016.

4.1 San Martín Mine, Queretaro, Mexico

Reserves

The San Martin Mine, an ISO 9001 certified facility located approximately 50km east of the City of Queretaro, State of Queretaro, Mexico, consists of mining concessions covering 12,992 hectares and includes seven underground mining units and four units under exploration, as well as an additional property, San Pedrito, located 50 km west of San Martin. Luismin (now “Goldcorp Mexico”) operated the mine from 1993 to January, 2007 when it was purchased by Starcore, who has been mining at San Martin at a rate of approximately 300,000 tonnes per year. Starcore expects to continue to operate the mine over an expected mine life of at least 5 years based on the current expected conversion of known resources and exploration is able to maintain approximately two years proven and probable reserves replacing those mined with new reserves, such that the total resource remains relatively constant from year to year. The Company’s last Resource estimate was filed on SEDAR “RESERVES AND RESOURCES IN THE SAN MARTIN MINE, MEXICO AS OF JULY 31, 2014”, dated October 6, 2014, prepared by Joseph Campbell, P. Eng. (the “Technical Report”), which is also available on the Company website www.starcore.com.

Production

The following table is a summary of mine production statistics for the San Martin mine for the periods ended April 30, 2016 and 2015 and for the previous year ended July 31, 2015.

	<i>Unit of measure</i>	Actual results for 9 months ended April 30, 2016	Actual results for 9 months ended April 30, 2015	Actual results for 12 months ended July 31, 2015
Mine production of gold in dore	<i>thousand ounces</i>	12.3	14.0	18.3
Mine production of silver in dore	<i>thousand ounces</i>	70.2	70.1	97.1
Total mine production – equivalent ounces	<i>thousand ounces</i>	13.2	14.9	19.6
Silver to Gold equivalency ratio		76.2	71.1	71.6:1
Mine Gold grade	<i>grams/tonne</i>	1.96	2.19	2.14
Mine Silver grade	<i>grams/tonne</i>	18.4	18.0	18.2
Mine Gold recovery	<i>percent</i>	84.9%	84.6%	85.1%
Mine Silver recovery	<i>percent</i>	51.7%	51.6%	53.1%
Milled	<i>thousands of tonnes</i>	229.6	234.6	311.9
Mine development, preparation and exploration	<i>meters</i>	4,079	4,464	6,055
Mine operating cash cost per tonne milled	<i>US dollars/tonne</i>	49	59	57
Mine operating cash cost per equivalent ounce	<i>US dollars/ounces</i>	846	920	903
Number of employees and contractors at minesite		299	299	301

During the quarter ended April 30, 2016, the mill operated at a rate of approximately 823 milled tonnes/calendar day. Gold and silver grades during the period ending April 30, 2016 was 1.96 g/t and 18.4 g/t, respectively, compared to prior comparable period grades of 2.19 g/t and 18.0 g/t. Overall equivalent gold production from the mine during the period ending April 30, 2016 of 13,215 ounces was lower than the previous comparable period production of 14,941 due to a decrease in ore grades and lower overall production tonnage of 74,070 tonnes compared to 76,168 tonnes in prior comparable period.

Production cash costs of the mine for the current period ending April 30, 2016 were US\$846/EqOz. This was significantly lower than the prior comparable period ending April 30, 2015 amount of US\$920/EqOz. The decrease in production EqOz. was largely due to the strength of the US dollar and due to cost savings in mine development and exploitation. This period's costs are lower than the prior year average of US\$903/EqOz as well.

Operating cash costs of US\$49/t were lower than the prior period of US\$59/t. Operating cash costs were also lower than the previous year end July 31, 2015 of US\$57/t due to the favourable US Dollar exchange rate and due to reductions in overall mine operating costs. The mine plan has been developed to ensure the mine is properly developed and mined so as to ensure a constant supply of ore in accordance with currently planned production capacity and ore grades. Changes to the plan that may involve increased production and capital investment are continually being assessed by management. Currently, the Company is continuing underground exploration in order to identify higher grade ore zones and has allocated an adequate budget to support year-long exploration, exceeding 12,000 metres of underground exploration drilling for the 2016 calendar year.

During the quarter ended April 30, 2016, the Company incurred approximately US\$215 in mine capital expenditures, which includes mine development drifting and drilling, machinery and equipment leases and purchases, and construction and tailings dam remediation, compared to US\$292 in the prior comparable period ending April 30, 2015.

4.2 Property Activity

San Martin properties – Queretaro, Mexico

The San Martin mine properties are comprised of mining concessions covering 12,992 hectares, excluding the San Pedrito property located approximately 50km west of the San Martin mine. In addition to the ongoing mine exploration and development that is currently being performed in development of the mine, management is continually assessing the potential for further exploration and development of the San Martin properties and continually modifying the exploration budget accordingly.

The mine operates three underground drill rigs to provide information to assist with mine planning in addition to exploration, with the intent of increasing the reserves and resources on the property, and the Company has achieved budgeted targets of approximately 11,000 metres of underground exploration drilling in calendar 2016.

David Gunning, P.Eng., a director of the Company and Chief Operating Officer, is the Company's qualified person under NI 43-101, and has reviewed and approved the scientific and technical disclosure on the San Martin Mine disclosed in this MD&A.

San Pedrito

The Company entered into a Binding Agreement ("Agreement") to sell the San Pedrito Property located in Queretaro, Mexico. The sale is expected to net the Company approximately USD \$7 Million. The Agreement requires the buyer to deposit 50 million Mexican Pesos ("MP") (approximately USD \$2.8 million), which has been received in trust and may only be released pending various confirmations, including compliance with state and municipal regulations and evidence that the property is in good standing.

The agreement is subject to a 50 million MP penalty clause in case of non-performance that will be effective if either the purchaser does not pay the owed amount when all the conditions have been met or if the Company does not wish to continue with the sale. Upon receipt of the required confirmations, the agreement provides for the subject conditions to be removed and the balance of funds to be paid immediately to the Company. The Company has not recorded the sale or deposit in these Financial Statements due to the pending conditions precedent.

The San Pedrito property was part of Starcore's original acquisition in 2007, when the Company acquired the San Martin Mine from Goldcorp for USD \$26 million. The Company has allocated a cost base of approximately \$3,750 to this property.

Acquisition of Creston Moly

On February 19, 2015, the Company closed the transaction to acquire all of the shares of Creston Moly from Deloitte Restructuring Inc. in its capacity as trustee in bankruptcy of Mercator Minerals Ltd. at a purchase price of CDN \$2 Million.

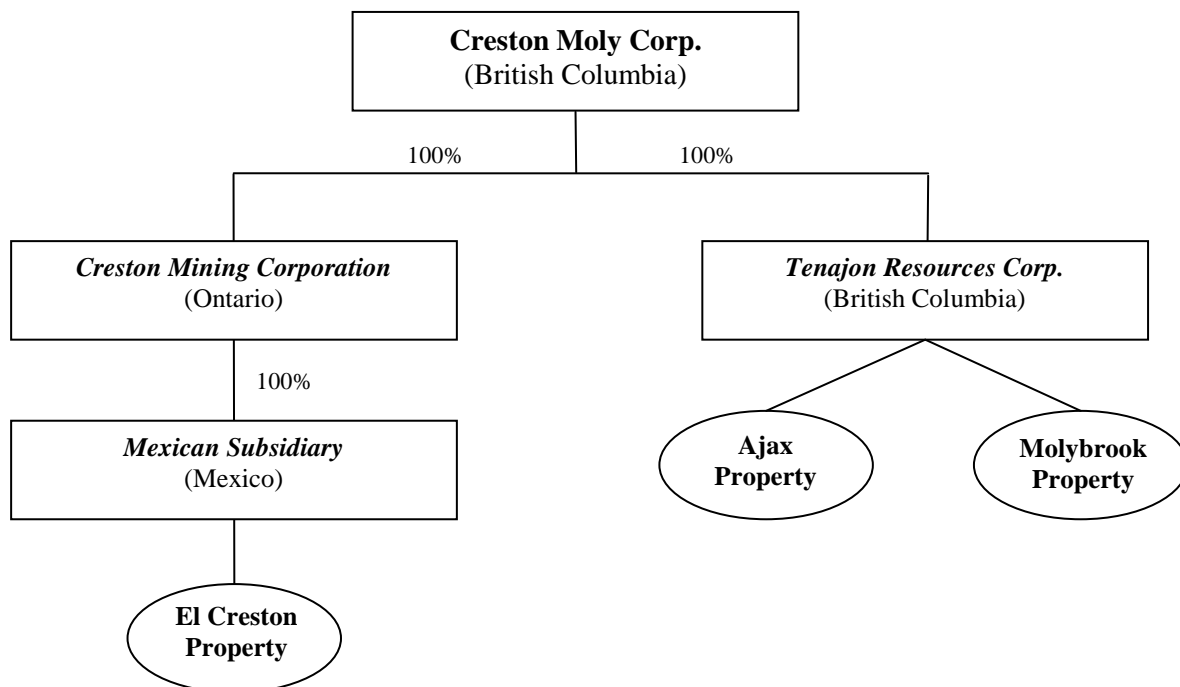

In June, 2011, Mercator Minerals Ltd. ("Mercator"), a TSX listed company, acquired Creston Moly in a cash and shares deal valuing Creston Moly at approximately \$194 million. At that time, the Board of Directors of Creston Moly, after receiving the recommendation of its special committee and consultation with its financial and legal advisors, unanimously supported the arrangement whereby Mercator would acquire all of the issued and outstanding common shares of Creston.

BMO Capital Markets, financial advisor to Creston Moly and its Board, provided a fairness opinion to the effect that the consideration (of \$194 million) was fair, from a financial point of view, to the shareholders of Creston Moly.¹ Creston shareholders voted in favour of the acquisition. The most significant asset in this acquisition was the El Creston project in Sonora, Mexico which had been advanced to a completed Preliminary Economic Assessment ("PEA").

On September 5, 2014, pursuant to the *Bankruptcy and Insolvency Act (Canada)*, Mercator and Creston Moly were deemed to have filed assignments in bankruptcy. Creston Moly is a British Columbia company that owns, through its subsidiaries, a 100% interest in the following properties:

¹ The information in this report relating to the acquisition of Creston Moly by Mercator has been drawn from documents filed under the Creston Moly Corp. issuer profile on SEDAR, more specifically: Creston's Management Information Circular dated May 9, 2011 and filed on SEDAR on May 16, 2011, and Creston's news release of June 6, 2011 as filed on SEDAR on June 7, 2011.

- The El Creston Project in Sonora, Mexico;
- The Ajax Project in British Columbia; and
- The Molybrook Project in Newfoundland.

El Creston Project, Sonora, Mexico:² The El Creston molybdenum property is located in the State of Sonora, Mexico, 175 kilometres south of the US Border and 145 kilometers northeast of the city of Hermosillo which has completed a Preliminary Economic Assessment on the property based on zones of porphyry-style molybdenum (“Mo”)/Copper (“Cu”) mineralization. In 2010, a PEA was prepared on the project by an independent consulting firm. The result of this study indicated that the El Creston molybdenum-copper deposit had a US \$561.9million net present value after tax (using an 8% discount rate). The internal rate of return (after tax) was calculated to be 22.3% and a capital cost payback was calculated to be four years.

Other highlights of the report include:

- ***Large moly-copper deposit in a mining-friendly jurisdiction.*** Total Measured and Indicated Resources of 215 million tonnes grading 0.071% Mo and 0.06% Cu, containing 336 Milbs Mo and 281 Milbs Cu. Mineral resources that are not mineral reserves do not have demonstrated economic viability;
- ***Initial Capital cost:*** US\$655.9million with payback of 4 years, based on metal prices of \$15/lb Mo and \$2.60/lb Cu. Metal recoveries were estimated at 88% for Mo and 84% for Cu;
- ***Low Operating Cost:*** operating cost of \$US4.12/lb Mo, net of copper credits, 0.84:1 waste to ore strip ratio within an optimized pit containing an additional 7.6 million tonnes of Inferred Resources responsible for \$20M of the NPV;
- ***Excellent infrastructure:*** Road accessible with a 230kV power grid within 50 km;
- ***Apart from the PEA,*** recommendations have been made to test known mineralization below the current pit-limiting “Creston Fault” where results such as drill hole EC08-54 returned 241.4m at 0.083% Mo and 0.059% Cu to a depth of 495m in the Red Hill Deep zone.

² The technical information in this news release relating to the El Creston Project is based on the technical report entitled “Preliminary Economic Assessment, El Creston Project, Opodepe, Sonora, Mexico”, dated December 16, 2010, filed under the Creston Moly Corp. issuer profile on SEDAR.. Information regarding the effective date of the mineral resources, key assumptions, parameters and methods used to estimate the mineral resources, and known risks that materially affect the mineral resources can be found in the technical report.

David Gunning, P.Eng., a director of the Company and Chief Operating Officer, is the Company's qualified person under NI 43-101, and has reviewed and approved the scientific and technical disclosure on the El Creston Project disclosed in this report.

Ajax, British Columbia, Canada³

Ajax Molybdenum Property is comprised of 11,718 hectares and is located 13 km north of Alice Arm, British Columbia. The Ajax Property, one of North America's largest undeveloped molybdenum deposits occupying a surface area of approximately 600 by 650 metres, is a world class primary molybdenum property in the advanced stage of exploration.

Molybrook, Newfoundland, Canada⁴

Creston's Molybrook molybdenum property located on the south coast of Newfoundland is centred 2.5 km from the outport of Grey River less than 4 kilometres from a deep water, ice free navigable fjord. The property hosts a 3 km long trend in which at least three zones of at surface molybdenum mineralization occur: Molybrook, Wolf and Chimney Pond. To date, almost all exploration has been completed on the Molybrook Zone where a large porphyry molybdenum deposit has been outlined.

The Company owns 100% of the 44 mineral claims of the Moly Brook molybdenum property, located 2.5 km from the Hamlet of Grey River on the southern coast of Newfoundland, pursuant to the acquisition of Creston Moly Corp. The Moly Brook property is subject to a 2% net smelter royalty ("NSR"), of which 1.5% can be purchased by the Company for \$1.5 million. During the period ended April 30, 2016, the Company reduced its claims to focus on the core project and to reduce its holding costs.

Acquisition of American Consolidated Minerals Corp.

On November 20, 2014, the Company announced the approval of the proposed acquisition of American Consolidated Minerals Corp ("AJC") pursuant to a plan of arrangement (the "Transaction") by the AJC shareholders.

The Transaction was completed on December 1, 2014 upon the satisfaction of all of the conditions set out in the arrangement agreement entered into by AJC and the Company on October 1, 2014, including approval by the Supreme Court of British Columbia.

Pursuant to the acquisition of AJC, the Company has acquired the right to 3 properties as follows:

³ Technical information in this report relating to the Ajax Project is based on the NI 43-101 Resource Estimate Press Release entitled "Tenajon Announces 75% Increase in Indicated Molybdenum Resources at Ajax Project", dated May 15, 2008 and the technical report entitled "Update of Resource Estimation, Ajax Property, Alice Arm, British Columbia", dated April 18, 2007, both of which are filed under the Tenajon Resources Corp. issuer profile on SEDAR.

⁴ Technical information in this report relating to the Moly Brook property is based on the technical report entitled "Technical Report, Moly Brook Property, Grey River Area, Newfoundland, Canada", dated June 15, 2009, filed under the Tenajon Resources Corp. issuer profile on SEDAR.

Sierra Rosario, Sinaloa, Mexico

Pursuant to the acquisition of AJC, the Company acquired a 50% interest in two claims over the 500-hectare Sierra Rosario Property, located in the state of Sinaloa, Mexico.

During the year ended July 31, 2015, the Company acquired the remaining 50% interest from the optionor for \$25 and a 1% NSR over the entire property.

Toiyabe, Nevada, USA

Pursuant to the acquisition of AJC, the Company has acquired the right to a 100% undivided interest, subject to a 3% NSR, in 165 mining claims located in Lander County, Nevada, United States of America (“Toiyabe”) from MinQuest.

Consideration to be paid for the interest is US\$900 and the Company must incur total exploration expenditures of US\$1,025 (US\$1,025 incurred) on the property, by the fifth anniversary of the “New Effective Date” as agreed by MinQuest. The New Effective Date shall be the earlier of October 15, 2018 or the date the Company enters into a joint venture agreement over Toiyabe or the date that the Company completes a bankable feasibility study on the property.

The optionor has also granted the Company the right to purchase up to one-half of the NSR (or 1.5%) on the basis of US\$2 million per each 1% of the royalty.

Lone Ranch, Washington, USA

Pursuant to the acquisition of AJC, the Company has acquired the right to a 100% undivided interest, subject to a 3% NSR in 73 mining claims located in Ferry County, Washington State, United States of America (“Lone Ranch”) from MinQuest Inc. (“MinQuest”).

Consideration to be paid for the interest is US\$360, and the Company must incur total exploration expenditures of US\$1,225 (\$175 incurred) on the property, by the third anniversary of the “New Effective Date” as agreed by MinQuest. The New Effective Date shall be the earlier of October 15, 2018 or the date the Company enters into a joint venture agreement over the property or the date that the Company completes a bankable feasibility study on the property.

The optionor has also granted the Company the right to purchase up to one-half of the NSR (or 1.5%) on the basis of US\$1.5 million per each 1% of the royalty. If the Company does not incur the exploration expenditures as specified, the unpaid portions may be paid to the optionor to maintain the option.

Acquisition of Cortez Gold Corp.

During the year ended July 31, 2015, the Company signed of a letter of intent with Cortez Gold Corp. (“Cortez or “CUT”) (TSXV: CUT) to acquire all of the outstanding securities of CUT in an all-share transaction to be completed pursuant to a court approved Plan of Arrangement under the Business Corporations Act (British Columbia) (the “Arrangement”). Under the terms of the planned acquisition, each CUT shareholder would receive three Starcore common shares for every one CUT common share held by CUT shareholders (the “Exchange Ratio”). Cortez is a Vancouver-based junior resource company that owns the Altiplano gold and silver processing plant in Matehuala, Mexico and has a director and officer in common with the Company.

Shareholders of Cortez approved the Arrangement which was finalised on approval by the British Columbia Supreme Court on August 5, 2015. Pursuant to the Arrangement, the former Cortez shareholders hold 7,166,888 common shares of Starcore, representing 15.87%, of the 45,153,599 outstanding common shares of Starcore after issue of shares pursuant to the Arrangement. In addition, each holder of the outstanding common share purchase warrants of CUT may receive such number of replacement warrants of Starcore based upon the Exchange Ratio and at the exercise price adjusted based upon the Exchange Ratio.

The Company valued the 7,166,888 shares at the fair market value on date of issue of \$0.42 per share, for total consideration of \$3,010, which was accounted for as acquisition of assets allocated based on their relative fair values on the closing date. The following purchase price allocation is based on management's best estimates and assumptions after taking into account all relevant information available.

Altiplano Goldsilver Processing Plant, Matehuala, Mexico

Altiplano has title to 20 hectares of land in Matehuala, S.L.P., Mexico, and to the buildings and equipment located thereon (the "Processing Plant").

The construction of the Processing Plant was completed in 2015 and Altiplano is ready to accept concentrates for processing. The Company announced that as of February 15, 2016, the Altiplano plant poured its first doré bar, weighing in at 21.131 kg. The Plant is currently in a pre-commissioning phase and any incidental revenue or expenses generated during this process has been capitalized under IAS 16 guidelines. The Company shall cease to record costs as part of the carrying amount of the Plant when the assets are in the condition necessary for it to be capable of operating in the manner intended by management.

Located within a historic mining district in an area that is home to numerous medium-sized mining operations, the Altiplano Plant is designed to employ a cleaner and more economical treatment production process that will enable the facility to offer lower processing rates than those currently available to concentrate producers in the area.

4.3 Results of Operations

The Company recorded earnings for the period ended April 30, 2016 of \$195 compared with \$306 for the comparative period ended April 30, 2015. The details of the Company's operating results and related revenues and expenses are as follows:

For the period ended April 30,	2016	2015	Variance
Revenues			
Mined ore	\$ 20,326	\$ 21,707	\$ (1,381)
Purchased concentrate	-	332	(332)
Total Revenue	20,326	22,039	(1,713)
Cost of Sales			
Mined ore	(14,093)	(15,554)	1,461
Purchased concentrate	-	(306)	306
Depreciation and depletion	(4,714)	(5,141)	427
Total Cost of Sales	(18,807)	(21,001)	2,194
Earnings from mining operations	1,519	1,038	481
Financing costs	(387)	(68)	(319)
Foreign exchange gain (loss)	(159)	1,199	(1,358)
Professional and consulting fees	(1,031)	(924)	(107)
Management fees and salaries	(918)	(733)	(185)
Office and administration	(1,114)	(981)	(133)
Other income	-	82	(82)
Shareholder relations	(110)	(82)	(28)
Regulatory and transfer agent fees	(244)	(99)	(145)
Impairment on investment	-	(175)	175
Loss before taxes	(2,444)	(743)	(1,701)
Income tax recovery			
Current	57	309	(252)
Deferred	2,582	740	1,842
Earnings for the period	\$ 195	\$ 306	\$ (111)

Overall, revenue from milled ore decreased by \$1.7 million compared to the prior period due mainly to lower metal production and lower gold and silver recovery in the current period compared to prior year. Cost of sales decreased in the current period due to lower tonnage processed and lower overall mine development costs and costs of labour and supplies, including chemicals and electricity. As a percentage of mined ore revenue, earnings from mining operations increased to 7% of mined ore revenue compared to 5% in the comparative period.

Sales of metals for the period ended April 30, 2016 approximated 12,666 ounces of gold and 72,105 ounces of silver sold at average prices in the period of US\$1,142 and US\$14.87 per ounce, respectively. This is a decrease in sale ounces from the comparative period ended April 30, 2015 where sales of metal approximated 14,709 ounces of gold and 73,642 ounces of silver, sold at higher average prices of US\$1,224 and US\$17.30 per ounce, respectively.

The total cost of sales above includes non-cash expenses for depreciation and depletion of \$4,714, compared to \$5,141 in the comparable period last period, which is calculated based on the units of production from the mine over the expected mine production as a denominator. This calculation is based solely on the San Martin mine proven and probable reserves and a percentage of inferred resources in accordance with the Company's policy of recognizing the value of expected Resources which will be converted to Proven and Probable Reserves, as assessed by management.

For the period ending April 30, 2016, the Company produced \$1,519 in earnings from mine operations compared to \$1,038 for the period ended April 30, 2015. The increase resulted partially due to the strengthening USD which converted into Canadian Dollar (“CDN”) at \$1.255 in the current period compared to \$1.210 at April 30, 2015, which increased revenues and concurrently lowered costs. The combination of slightly higher recoveries for gold and silver, despite a lower metal price per ounce, resulted in higher revenue as compared to the prior period.

Costs per ounce for the period ended April 30, 2016 were much lower at an average operating cash cost of US\$846/EqOz. compared to an average operating cash cost of US\$920/EqOz. during the period ended April 30, 2015, resulting in reported mined ore costs which were \$2,194 lower at \$18,807. Also included in mined ore costs in the current period is depletion of \$4,714 compared to \$5,141 for the period ended April 30, 2015.

Other Items

Changes in other items for the period ended April 30, 2016, resulted in the following significant changes from the period ended April 30, 2015:

- Financing costs during the period increased by \$319 due to the debt that was raised by the Company to finance the Altiplano project;
- Office and administration increased by \$133 due higher corporate costs relating to acquisition of CUT, general regulatory administration and office related costs.
- Foreign exchange decreased by \$1,358 for the period ended April 30, 2016. The decrease relates primarily due to the weakening of the Mexican peso and Canadian dollar in relation to the US dollar, the functional currency of the mining operations in the prior comparable period.
- Professional and consulting fees increased by \$107 to \$1,031 due to higher fees charged in relations to legal, tax and audit fees in the prior comparative period.
- Transfer Agent Fees increased by \$145 due to costs relating to registration on the United States markets.
- Deferred Income Tax Recovery increased by \$1,842 due to the Company recognizing its ability to use its non-capital loss carry forwards in the current and future years.

Sustaining Costs

In conjunction with a non-GAAP initiative being undertaken within the gold mining industry, the Company has adopted an “all-in sustaining cash cost” non-GAAP performance measure that the Company believes more fully defines the total costs associated with producing gold; however this performance measure has no standardized meaning. As the measure seeks to reflect the full cost of equivalent gold production from current operations, new project capital is not included in the calculation. Accordingly it is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The Company reports this measure on a sales basis:

<i>(In Canadian Dollars unless indicated)</i> For the period ended April 30,	Sustaining Costs (in 000’s)		Sustaining Costs Per Ounce (in \$/oz)	
	2016	2015	2016	2015
Total cost of sales cash costs ¹	\$ 14,093	\$ 15,554	\$ 1,036	\$ 988
Total corporate and administration cash costs ²	3,415	2,831	251	180
Foreign exchange gain	159	(1,199)	12	(76)
Reclamation and closure accretion	65	61	5	4
Sustaining capital expenditures and exploration ³	3,534	2,642	260	168
All-in sustaining cash costs	21,266	19,889	1,563	1,264
Foreign exchange adjustment	(5,365)	(2,887)	(394)	(183)
All-in sustaining USD cash costs	\$ 15,901	\$ 17,002	\$ 1,169	\$ 1,081
Total equivalent ounces sold	13,605	15,749		

¹ Excludes non-cash depletion of \$4,714 for the period ended April 30, 2016 (April 30, 2015: \$5,141) and includes non-cash share-based compensation of \$Nil (April 30, 2015: \$16).

² Includes non-cash share-based compensation of \$Nil for the period ended April 30, 2016 (April 30, 2015: \$119).

³ Certain capital expenditures costs that are non-sustaining costs have been excluded in accordance with AISC guidelines.

Cash Flows

Cash flows generated from operating activities were \$5,359 during the period ended April 30, 2016, compared to \$3,229 for the comparative period ended July 31, 2015. Cash flows from operating activities were determined by removing non-cash expenses from the earnings and adjusting for non-cash working capital amounts. Cash raised for financing activities resulted in an inflow of \$3,663 mainly due to the debt borrowing in the period of \$3,850. Cash used for investing activities resulted in an outflow of \$7,372 due to purchase of short term investment of \$3,162, investment in mining interest, plant and equipment of \$3,700 and investment in exploration and evaluation assets of \$517. Overall cash increased during the period ended April 30, 2016 by \$1,650.

Investor Relations Activities

During the period ended April 30, 2016, the Company responded directly to investor inquiries.

Financings, Principal Purposes & Milestones

During the period ended April 30, 2016, the Company completed a private placement of secured bonds in the aggregate principal amount of \$4.5 million. The bonds bear interest of 8% per annum, payable on maturity, and mature November 12, 2016.

During the period the Company issued 7,166,888 shares were issued pursuant to the plan of arrangement at \$0.42 whereby the Company acquire all of the outstanding shares of Cortez Gold Corp.

The Company also issued 3,993,203 shares to settle the outstanding debt as at July 31, 2015 in the aggregate amount of \$2,241 owed to certain creditors. The Receipts were issued at a deemed price of \$0.56 per Receipt.

5. Summary of Quarterly Results

The following is a summary of the Company's financial results for the eight most recently completed quarters:

	Q3		Q2		Q1		Q4	
	30-Apr-16		31-Jan-16		31-Oct-15		31-Jul-15	
Total Revenue	\$	5,668	\$	6,954	\$	7,704	\$	6,366
Earnings (loss) from mining operations	\$	(287)	\$	670	\$	1,136	\$	(393)
Earnings (loss) for period	\$	(283)	\$	240	\$	562	\$	(96)
Per share – basic	\$	(0.01)	\$	0.00	\$	0.02	\$	(0.00)
Per share – diluted	\$	(0.01)	\$	0.00	\$	0.02	\$	(0.00)
	Q3		Q2		Q1		Q4	
	30-Apr-15		31-Jan-15		31-Oct-14		31-Jul-14	
Total Revenue	\$	7,227	\$	7,143	\$	7,669	\$	7,742
Earnings (loss) from mining operations	\$	374	\$	213	\$	451	\$	1,126
Earnings (loss) for period	\$	(484)	\$	(116)	\$	906	\$	(2,170)
Per share – basic	\$	(0.01)	\$	(0.01)	\$	0.02	\$	(0.06)
Per share – diluted	\$	(0.01)	\$	(0.01)	\$	0.02	\$	(0.06)

Discussion

The Company reports a loss of \$283 for the quarter compared to loss of \$484 in the comparative quarter ended April 30, 2015. Revenue from mining operations decreased in this quarter to \$5,668 from the comparative quarter of \$7,227 as a result of lower ore production. For more detailed discussion on the quarterly production results and financial results for the quarter ended April 30, 2016, please refer to *Sections 4.1 and 4.3 under "Results of Operations"*.

6. Liquidity and Commitments

The Company expects to continue to receive income and cash flows from the mining operations at San Martin (*section 4.1*). Management expects that this will result in sufficient working capital and liquidity for the Company for the next twelve months.

As at April 30, 2016, the Company had the following commitments:

- a) As at April 30, 2016, the Company has shared lease commitments for office space of approximately \$144 per year, expiring at various dates up to April 2020, which includes minimum lease payments and estimated taxes, but excluded operating costs, taxes and utilities, to expiry.
- b) As at April 30, 2016, the Company has a land lease agreement commitment with respect to the land at the mine site, for \$132 per year until December 2017. The Company also has ongoing commitments on the exploration and evaluation assets of approximately \$220 per year.
- c) As at April 30, 2016, the Company has management contracts to officers and directors totaling \$840 per year, payable monthly, expiring in January 2017.

Obligations due within twelve months of April 30:	2016	2017-2019	2020 and beyond
Trade and other payables	\$ 3,091	\$ -	\$ -
Current portion of loan payable	4,619	-	-
Non-current portion of loan payable	-	1,369	-
Rehabilitation and closure cost provision	-	-	1,401

7. Capital Resources

The capital resources of the Company are the mining interests, plant and equipment, with an amortized historical cost of \$56,618 as at April 30, 2016. The Company is committed to further expenditures of capital required to maintain and to further develop the San Martin mine which management believes will be funded directly from the operating cash flows of the mine.

8. Off Balance Sheet Arrangements

The Company has no off balance sheet transactions.

9. Transactions with Related Parties

The Company paid the following amounts to key management and directors in the period:

<u>For the</u>	<u>Nine months ending April 30, 2016</u>	<u>Year ending July 31, 2015</u>
Management fees	\$ 624	\$ 840
Legal fees	256	95
Directors fees	70	60
Share-based payments	-	107
Total	\$ 950	\$ 1,102

There were no other material reportable related party transactions other than the acquisition of Cortez Gold Corp. discussed in section 4.2.

10. Third Quarter

Due to mine operating activity of the San Martin mine discussed throughout this MD&A and as detailed in Section 4.1, the operations and activities are similar to previous quarters which are discussed in *Section 4.3 – Results of Operations*.

11. Proposed Transactions

San Pedrito

The Company entered into a Binding Agreement (“Agreement”) to sell the San Pedrito Property located in Queretaro, Mexico. The sale is expected to net the Company approximately USD \$7 Million. The Agreement requires the buyer to deposit 50 million Mexican Pesos (“MP”) (approximately USD \$2.8 million), which has been received in trust and may only be released pending various confirmations, including compliance with state and municipal regulations and evidence that the property is in good standing.

The agreement is subject to a 50 million MP penalty clause in case of non-performance that will be effective if either the purchaser does not pay the owed amount when all the conditions have been met or if the Company does not wish to continue with the sale. Upon receipt of the required confirmations, the agreement provides for the subject conditions to be removed and the balance of funds to be paid immediately to the Company. The Company has not recorded the sale or deposit in these Financial Statements due to the pending conditions precedent.

12. Critical Accounting Estimates

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgements are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in accounting estimate is recognized prospectively by including it in the Company’s profit or loss in the period of the change, if it affects that period only, or in the period of the change and future periods, if the change affects both.

Information about critical judgements in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the consolidated financial statements within the current financial period are discussed below:

a) Economic Recoverability and Profitability of Future Economic Benefits of Mining Interests

Management has determined that mining interests, evaluation, development and related costs incurred which have been capitalized are economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefit including geologic and metallurgic information, history of conversion of mineral deposits to proven and probable reserves, scoping and feasibility studies, accessible facilities, existing permits and life of mine plans.

b) Rehabilitation Provisions

Rehabilitation provisions have been created based on the Company’s internal estimates. Assumptions, based on the current economic environment, have been made which management believes are a reasonable basis upon which to estimate the future liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. Estimates are reviewed annually and are based on current regulatory requirements. Significant changes in estimates of contamination, restoration standards and techniques will result in changes to provisions from period to period. Actual rehabilitation costs will ultimately depend on future market prices for the rehabilitation costs, which will reflect the market condition at the time of the rehabilitation costs are actually incurred. The final cost of the currently recognized rehabilitation provision may be higher or lower than currently provided for.

The inflation rate applied to estimated future rehabilitation and closure costs is 3.5% and the discount rate currently applied in the calculation of the net present value of the provision is 8%

c) Impairments

The Company assesses its mining interest, plant and equipment assets annually to determine whether any indication of impairment exists. Where an indicator of impairment exists, a formal estimate of the recoverable amount is made, which is considered to be the higher of the fair value less costs to sell and value in use. These assessments require the use of estimates and assumptions such as long-term commodity prices, discount rates, future capital requirements, exploration potential and operating performance.

d) Income Taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The company recognizes liabilities and contingencies for anticipated tax audit issues based on the Company's current understanding of tax law. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability including the related interest and penalties in the current tax provision. Management believes they have adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

In addition, the Company recognizes deferred tax assets relating to tax losses carried forward to the extent there are sufficient taxable temporary differences (deferred tax liabilities) relating to the same taxation authority and the same taxable entity against which the unused tax losses can be utilized. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recuperated.

e) Share-Based Payment Transactions

The Company measures the cost of equity-settled transactions with employees, and some with non-employees, by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them.

f) Mineral Reserves and Mineral Resource Estimates

Mineral reserves are estimates of the amount of ore that can be economically and legally extracted from the Company's mining properties. The Company estimates its mineral reserve and mineral resources based on information compiled by Qualified Persons as defined by Canadian Securities Administrators National Instrument 43-101 Standards for Disclosure of Mineral Projects. Such information includes geological data on the size, depth and shape of the mineral deposit, and requires complex geological judgments to interpret the data. The estimation of recoverable reserves is based upon factors such as estimates of commodity prices, future capital requirements, and production costs along with geological assumptions and judgments made in estimating the size and grade that comprise the mineral reserves. Changes in the mining reserve or mineral resource estimates may impact the carrying value of mineral properties and deferred development costs, property, plant and equipment, provision for site reclamation and closure, recognition of deferred income tax assets and depreciation and amortization charges.

g) Units of production depletion

Estimated recoverable reserves are used in determining the depreciation of mine specific assets. This results in depreciation charges proportional to the depletion of the anticipated remaining life of mine production. Each item's life, which is assessed annually, has regard to both its physical life limitations and to present assessments of economically recoverable reserves of the mine property at which the asset is located. These calculations require the use of estimates and assumption, including the amount of recoverable reserves and estimate of future capital expenditure. Changes are accounted for prospectively.

13. Changes in Accounting Policies

Effective August 1, 2015, the Company adopted new and revised International Financial Reporting Standards that were issued by IASB as detailed in Note 3(o) to the audited consolidated financial statements. The application of these new and revised standards and interpretations has not had any material impact on the amounts reported for the current and prior years but may affect the accounting for future transactions or arrangements.

14. Financial and Other Instruments

All significant financial assets, financial liabilities and equity instruments of the Company are either recognized or disclosed in the audited consolidated financial statements together with other information relevant for making a reasonable assessment of future cash flows, interest rate risk and credit risk. Where practicable the fair values of financial assets and financial liabilities have been determined and disclosed; otherwise only available information pertinent to fair value has been disclosed.

In the normal course of business, the Company's assets, liabilities and forecasted transactions are impacted by various market risks, including currency risks associated with inventory, revenues, cost of sales, capital expenditures, interest earned on cash and the interest rate risk associated with floating rate debt.

Currency risk is the risk to the Company's earnings that arises from fluctuations of foreign exchange rates and the degree of volatility of these rates. The primary currency the Company exposed to is the United States dollar which is also the functional currency of the San Martin Mine. The Company does not use derivative instruments to reduce its exposure to foreign currency risk. At April 30, 2016 the Company had the following financial assets and liabilities denominated in CDN and denominated in Mexican Pesos:

In '000 of	CDN Dollars	Mexican Pesos (MP)
Cash and cash equivalents	\$ 431	MP 35,112
Long term liabilities	\$ 2,163	-
Other working capital amounts – net	\$ (4,619)	MP (105,118)

At April 30, 2016, US dollar amounts were converted at a rate of \$1.2549 Canadian dollars to \$1 US dollar and Mexican Pesos were converted at a rate of MP17.19 to \$1 US Dollar.

15. Other

15.1 Disclosure of Outstanding Share Capital as at July 22, 2016

	Number	Book Value
Common Shares	49,146,851	\$ 50,605

The following is a summary of changes in options from April 30, 2016 to July 22:

Grant Date mm/dd/yy	Expiry Date mm/dd/yy	Exercise Price	Opening Balance	During the Period			Closing	Closing, Vested and Exercisable
				Granted	Exercised	Cancelled/ Forfeited		
05/06/11	05/06/16	\$0.60	37,500	-	-	37,500	-	-
01/16/12	01/16/17	\$0.80	100,000	-	-	-	100,000	100,000
01/27/12	01/27/17	\$1.00	485,000	-	-	-	485,000	485,000
04/13/12	04/13/17	\$1.48	812,500	-	-	-	812,500	812,500
08/22/13	08/22/18	\$1.00	200,000	-	-	-	200,000	200,000
08/22/13	08/22/18	\$0.80	68,750	-	-	-	68,750	68,750
09/06/13	09/06/18	\$0.92	50,000	-	-	-	50,000	50,000
09/12/13	09/12/18	\$1.00	50,000	-	-	-	50,000	50,000
01/15/14	01/15/19	\$0.88	1,042,500	-	-	-	1,042,500	1,042,500
			2,846,250	-	-	-	2,808,750	2,808,750
Weighted Average Exercise Price			\$1.07	-	-	\$0.60	\$1.08	\$1.08

Subsequent to the period ended April 30, 2016, 139,284 warrants and 37,500 options expired due to natural expiry.

15.2 Disclosure Controls and Procedures

The Company's management, with the participation of its Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures. Based upon the results of that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed by the Company in reports it files is recorded, processed, summarized and reported, within the appropriate time periods and forms.

Internal Controls Over Financial Reporting

The Company's management, with the participation of its Chief Executive Officer and Chief Financial Officer, are responsible for establishing and maintaining adequate internal control over financial reporting. Under the supervision of the Chief Financial Officer, the Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with IFRS. The Company's controls include policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with IFRS; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the annual consolidated financial statements or interim financial statements.

There has been no change in the Company's internal control over financial reporting during the Company's period ended April 30, 2016 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Limitations of Controls and Procedures

The Company's management, including the Chief Executive Officer and Chief Financial Officer, believe that any disclosure controls and procedures or internal controls over financial reporting, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. The design of any systems of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.
