# Disclaimer

The data contained herein is provided for information purposes only. Certain information has been compiled from sources believed to be reliable. No information in this presentation is to be construed as an offer to buy or sell securities. Some statements contained in this presentation are forward-looking and, therefore, involve uncertainties or risks that could cause actual results to differ materially. Such forward-looking statements include among other things, comments regarding mining and milling operations, mineral resource statements and exploration program performance. They may also include statements with respect to the Company's mineral discoveries, plans, outlook and business strategy. The words "may", "would", "could", "should", "will", "likely", "expect," "anticipate," "intend", "estimate", "plan", "forecast", "project" and "believe" or other similar words and phrases are intended to identify forward-looking information. Factors that could cause actual results to differ materially include, but are not limited to, metal price volatility, economic and political events affecting metal supply and demand, fluctuations in mineralization grade, geological, technical, mining or processing problems, exploration programs and future results of exploration programs, future profitability and production, the ability to raise sufficient capital to fund exploration, litigation, legislative, environmental and other judicial, regulatory, political and competitive developments; technological or operational difficulties or inability to obtain permits encountered in connection with exploration activities, and labour relations matters. This list is not exhaustive of the factors that may affect our forward-looking information. These and other factors should be considered carefully and readers should not place undue reliance on such forward-looking information. The Company disclaims any intention or obligation to update or revise forward-looking information, whether as a result of new information, future events or otherwise. The reader agrees to hold the Company and its subsidiaries, and their respective officers, employees and agents harmless against any claims for damages or cost or any loss of any kind arising out of the access to or use of this presentation or any information contained in or obtained through this presentation.

Cautionary Note to United States Investors Concerning Estimates of Measured, Indicated and Inferred Resources: These tables use the terms "Measured", "Indicated" and "Inferred" Resources. United States investors are advised that while such terms are recognized and required by Canadian regulations, the United States Securities and Exchange Commission does not recognize them. "Inferred Mineral Resources" have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. United States investors are cautioned not to assume that all or any part of Measured or Indicated Mineral Resources will ever be converted into Mineral Reserves. United States investors are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists, or is economically or legally mineable. Salvador Garcia Eng, a director of the Company and Chief Operating Officer, is the Company's qualified person on the project as required under NI 43-101 and has prepared the technical information contained in this presentation.

# The Value Proposition

**MANAGEMENT**  
The right combination of technical, country, and capital markets experience

**GOLD PRODUCING**  
Our San Martin mine is an efficient producer at approximately 12,000 AuEq a year with a 10-year mine life

**EXPLORATION EXPOSURE**  
Low risk/high reward assets that provide accretive value to our shareholders

**DEBT FREE**  
The company is debt free with a strong share structure.

# Operational Transformation

Sold unprofitable Altiplano operations in 2019 for proceeds of US\$1.6million used to repay debt. Sold Toiyabe Project to focus on Mexico.

Updated 43-101 and increased development meters to maintain a 10 year mine life. Changed mining method to room and pillar further increasing savings per tonne.

Reduced workforce by 32% and milling lower tonnage of higher-grade ore. Realize monthly savings of approx. US\$350k with minor reduction in metal production.

Reduced management salary by 25% saving \$500k/year

Overall mine costs reduced to US\$60/tonne in 2020 YTD compared to \$74/tonne in 2019.

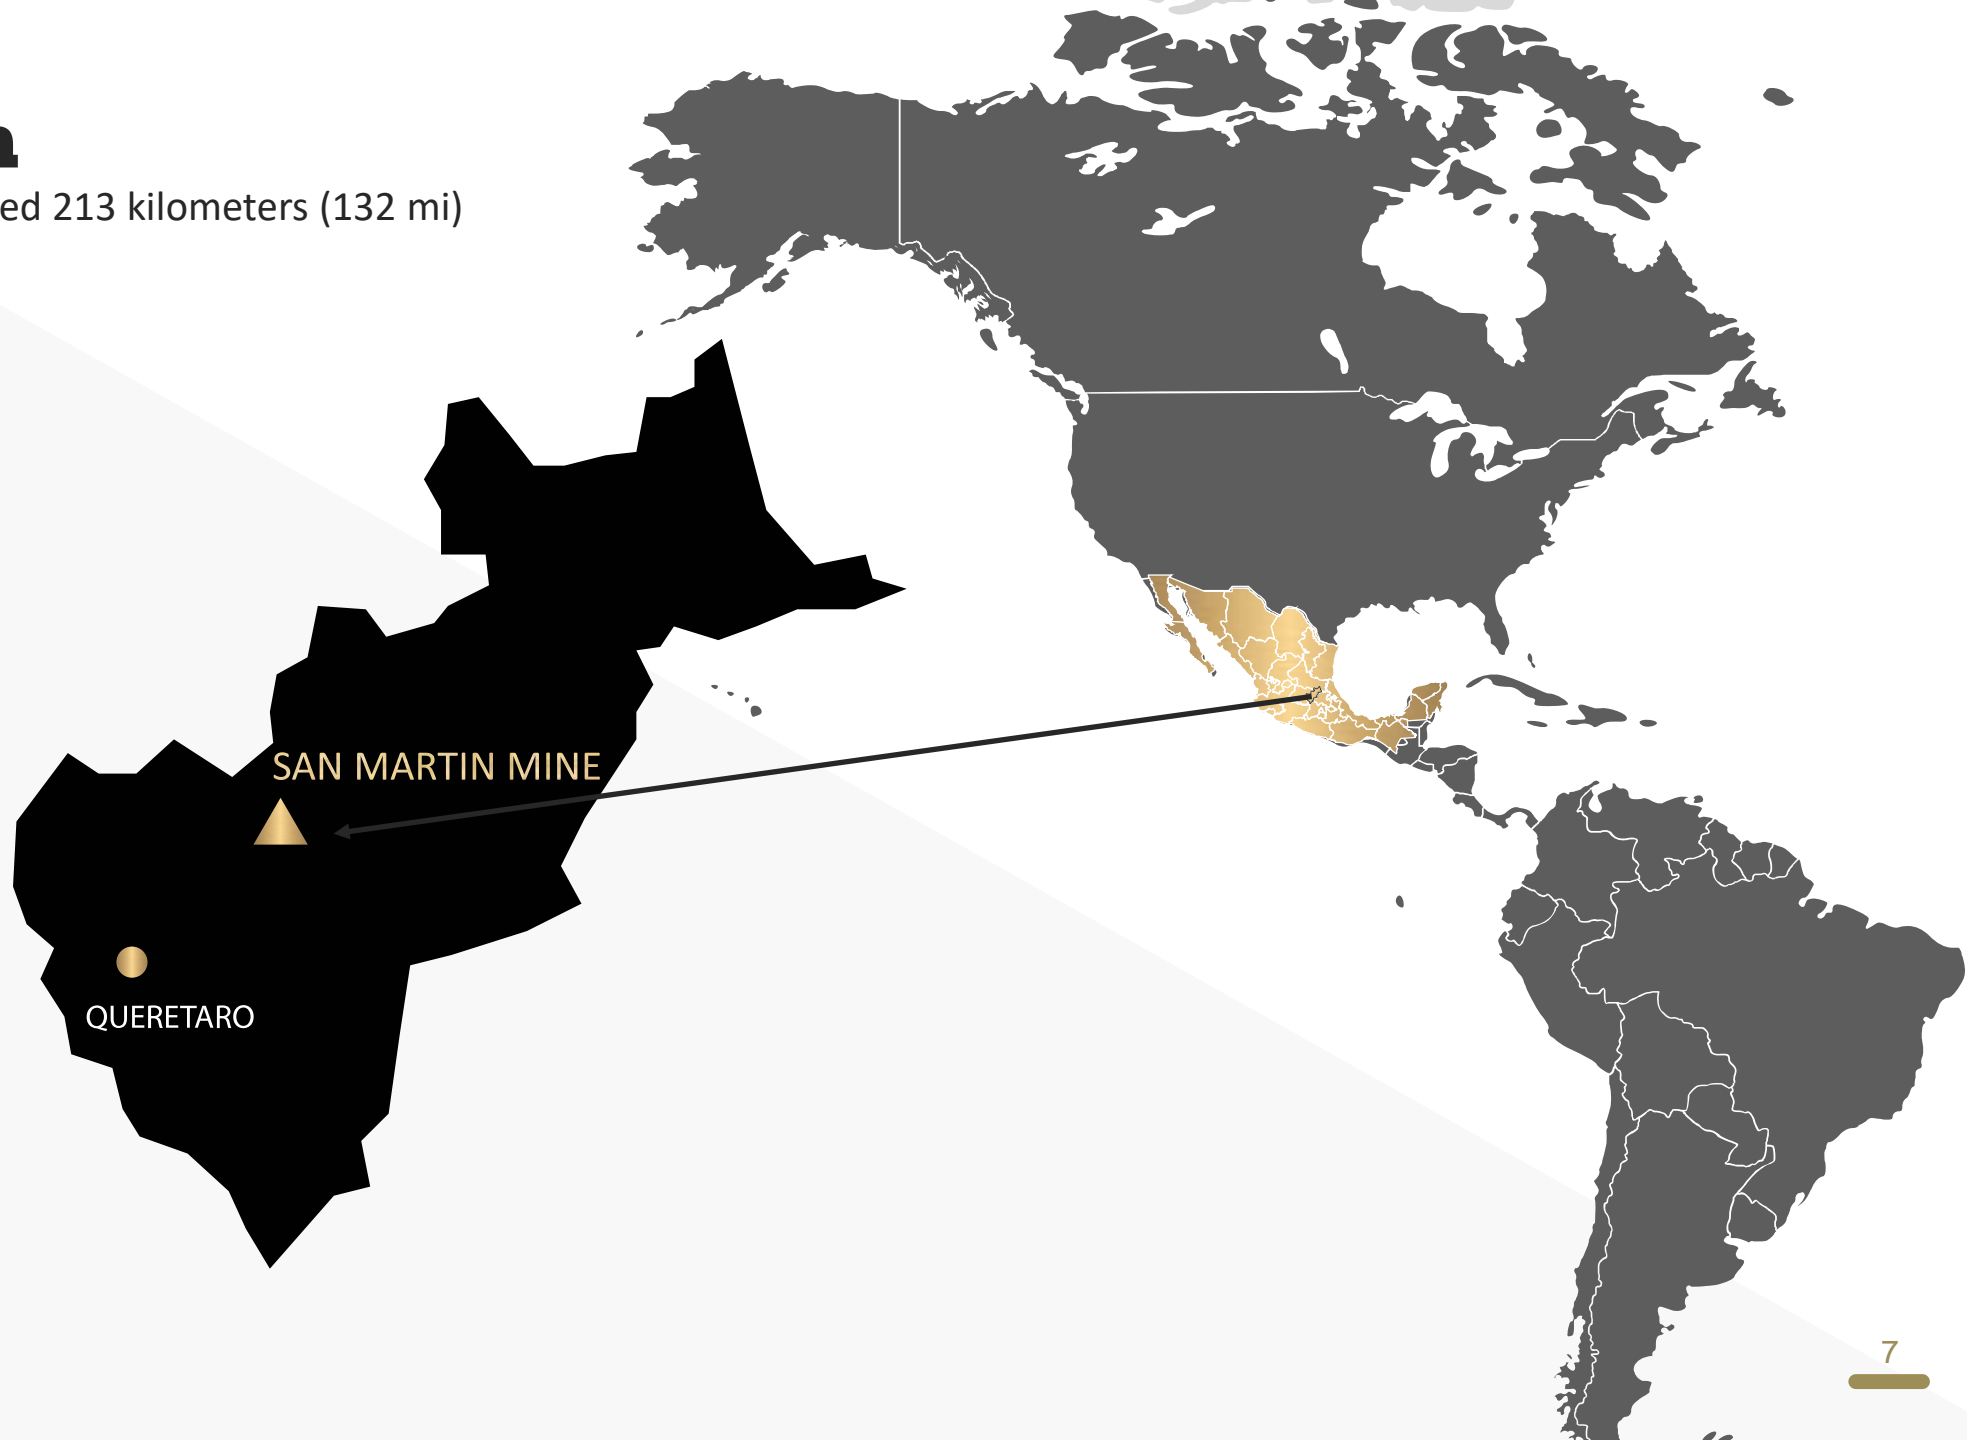

Bolstered structural engineering team and young professional talent

# San Martin Mine

# Location

Queretaro, Mexico - Located 213 kilometers (132 mi) northwest of Mexico City

# San Martin Mine

- **Mining Method** - Cut and fill/room and pillar
- **Backfill** - Waste rock, shotcrete and rock bolting
- **Access** - Tunnels and ramps some 300m to mill
- **Products** - Gold, silver in a dore bar
- **Logistics** – Dore bar shipped to Europe for refining
- **Mine life**- 10 years+ after recent 43-101 (sept 2019)
- **Claims** - 5000 Ha in Queretaro, Mexico
- **Mineralization** - Epithermal probably low sulphidation
- **Host rock** - Limestone which leads to cost efficient mining
- **Processing** - Conventional cyanide using Meryl Crowe
- **Power** - Connected to national grid
- **Mill Capacity**- 1100 tpd- Current- approx. 650 tpd

# San Martin Mine 43-101

The San Martin Mine continues to produce ounces and generate cash flow. The updated 43-101 reflects our efforts to extend mine life while new operational management focuses on unlocking the geological mystery.

Erme Enriquez C.P.G., BSc, MSc., is an independent consultant to the Company. He is a qualified person on the project as required under NI 43-101 and has prepared the technical information contained in these estimates and has been reviewed by Salvador Garcia, P. Eng., and COO of the Company.

## **Assumptions made were:**

1. Reserve cut-off grades are based on a 1.66 g/t gold equivalent
2. Metallurgical Recoveries were 88% gold and 55% silver
3. Minimum mining widths were 1.5 meters, Dilution factors are 20%
4. Gold equivalents are based on a 1:81 gold:silver ratio
5. Price assumptions are \$1300 per ounce for gold and \$16 per ounce for silver

# Corporate Social Responsibility

Our ability to build a social and economic platform for growth directly impacts our employees and local stakeholders. We implement environmental initiatives such as a dry stack tailings dam where we can carry out reforestation projects to building green houses where vegetable production is sold back to the community at cost. We also implement health and safety standards and routine checks that ensure a healthy workforce for current and present well being. Our corporate social responsibility programs are the cornerstone to growth and building value for all shareholders and stakeholders involved.

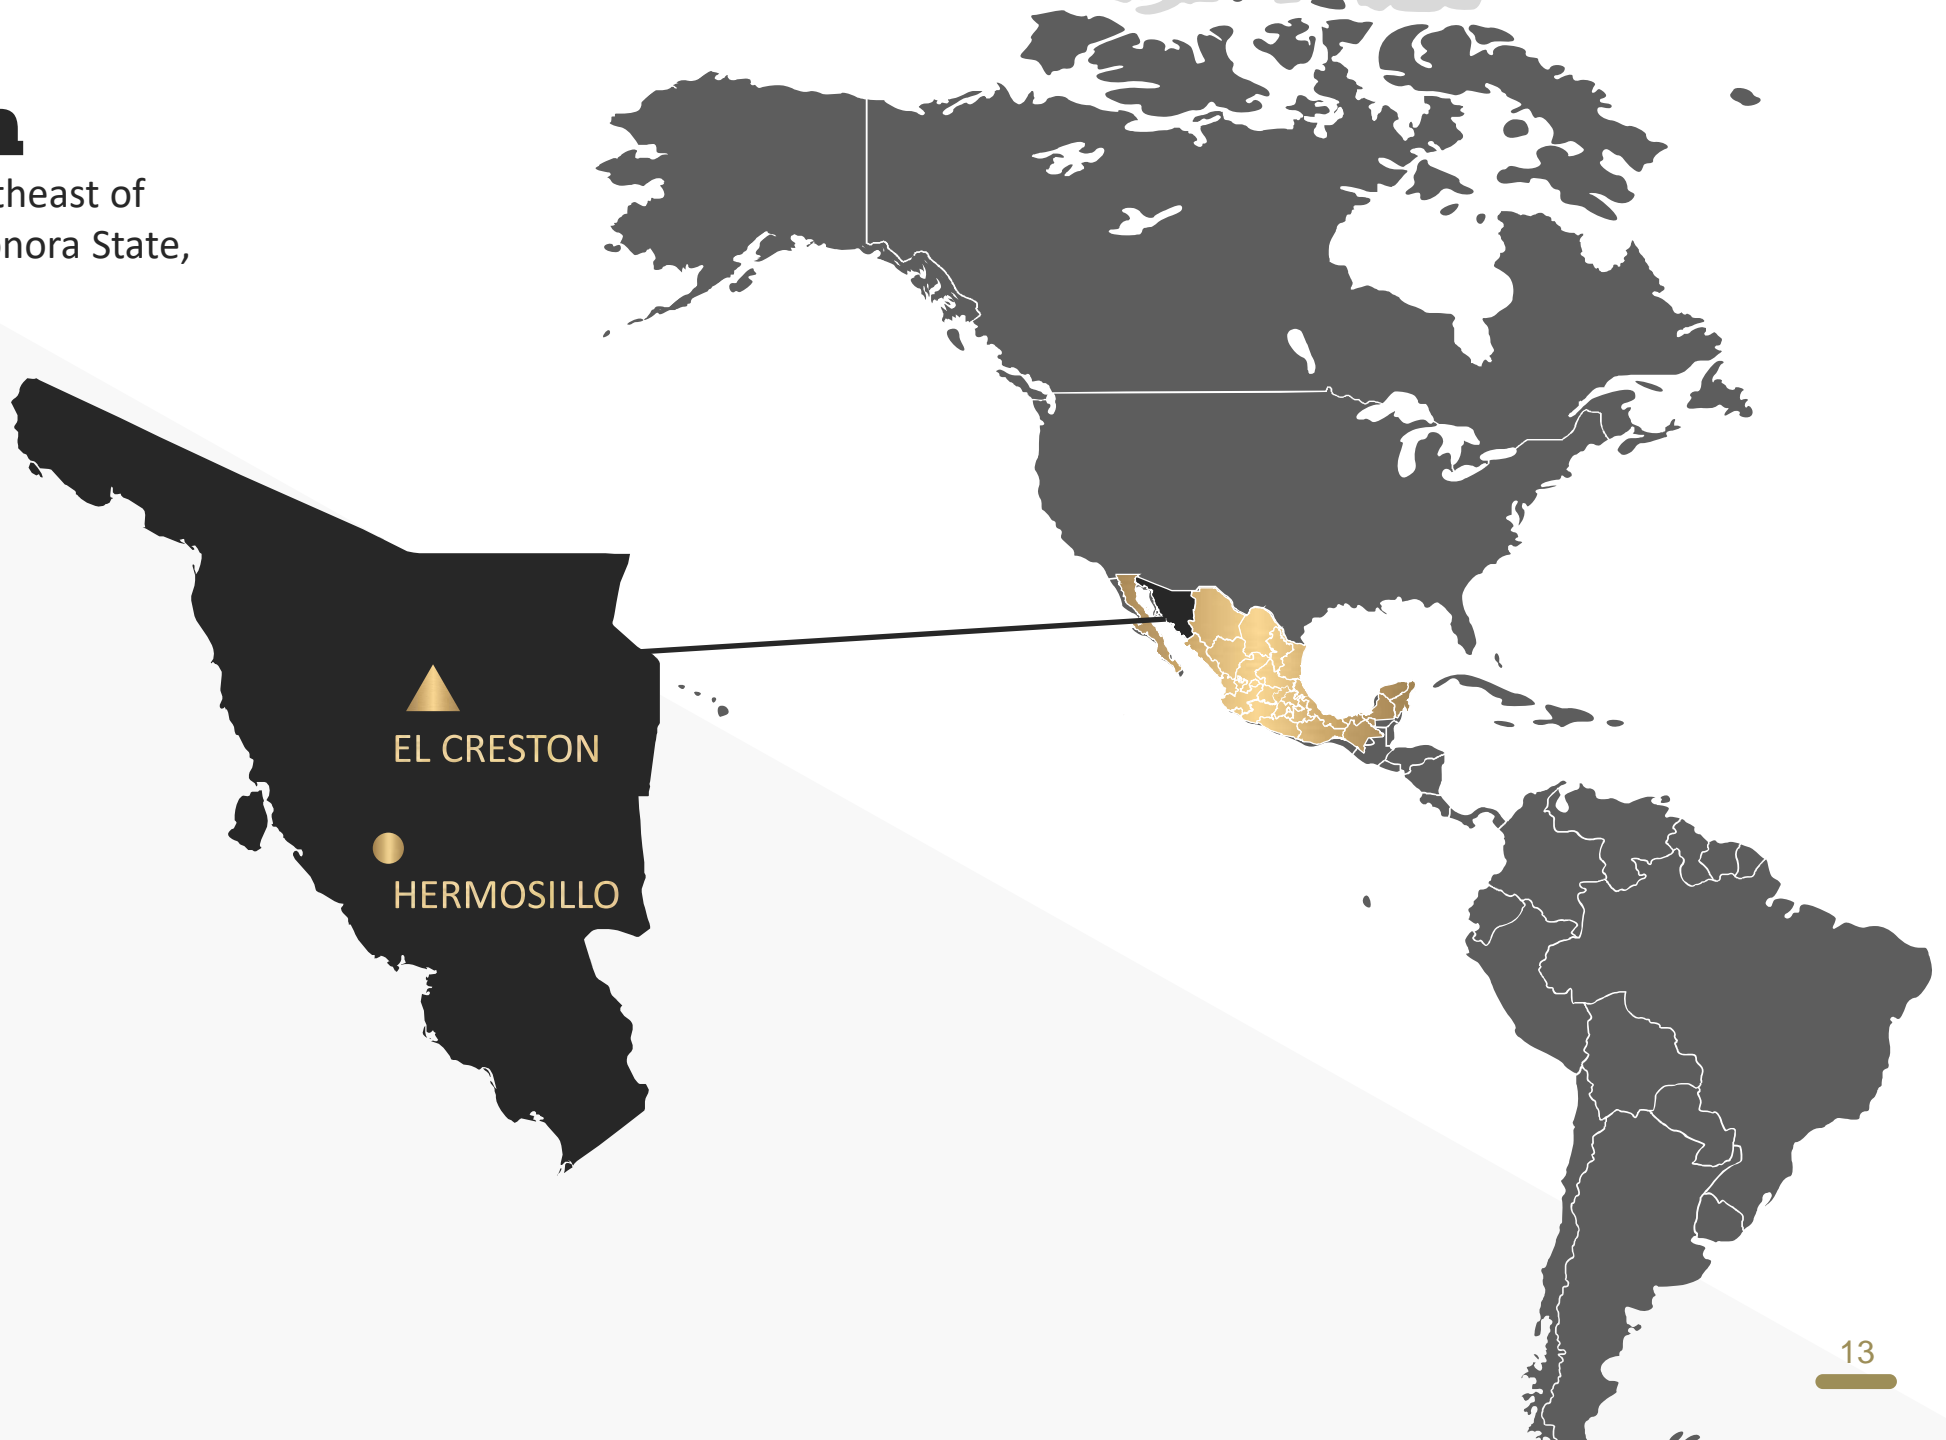

# El Creston

A LARGE COPPER-MOLYBDENUM DEPOSIT
