CORPORATE PRESENTATION FEB. 2026

**UNLOCKING
DISTRICT-SCALE GROWTH
FROM HIGH-GRADE SILVER
IN MEXICO**

TSX: SAM | FSE: V4JA

DISCLAIMER

The data contained herein is provided for information purposes only. Certain information has been compiled from sources believed to be reliable. No information in this presentation is to be construed as an offer to buy or sell securities. Some statements contained in this document are forward-looking and, therefore, involve uncertainties or risks that could cause actual results to differ materially. Such forward-looking statements include among other things, comments regarding mining and milling operations, mineral resource statements and exploration program performance. They may also include statements with respect to the Company's mineral discoveries, plans, outlook and business strategy. The words "may", "would", "could", "should", "will", "likely", "expect," "anticipate," "intend", "estimate", "plan", "forecast", "project" and "believe" or other similar words and phrases are intended to identify forward-looking information. Factors that could cause actual results to differ materially include, but are not limited to, metal price volatility, economic and political events affecting metal supply and demand, fluctuations in mineralization grade, geological, technical, mining or processing problems, exploration programs and future results of exploration programs, future profitability and production, the ability to raise sufficient capital to fund exploration, litigation, legislative, environmental and other judicial, regulatory, political and competitive developments; technological or operational difficulties or inability to obtain permits encountered in connection with exploration activities, and labour relations matters. This list is not exhaustive of the factors that may affect our forward-looking information. These and other factors should be considered carefully, and readers should not place undue reliance on such forward-looking information. The Company disclaims any intention or obligation to update or revise forward-looking information, whether as a result of new information, future events or otherwise. The reader agrees to hold the Company and its subsidiaries, and their respective officers, employees and agents harmless against any claims for

damages or cost or any loss of any kind arising out of the access to or use of this presentation or any information contained in or obtained through this presentation. Cautionary Note to United States readers concerning Estimates of Measured, Indicated and Inferred Resources: These tables use the terms "Measured", "Indicated" and "Inferred" Resources. United States readers are advised that while such terms are recognized and required by Canadian regulations, the United States Securities and Exchange Commission does not recognize them. "Inferred Mineral Resources" have a great amount of uncertainty as to their existence, and as to their economic and legal feasibility. It cannot be assumed that all or any part of an Inferred Mineral Resource will ever be upgraded to a higher category. Under Canadian rules, estimates of Inferred Mineral Resources may not form the basis of feasibility or other economic studies. United States readers are cautioned not to assume that all or any part of Measured or Indicated Mineral Resources will ever be converted into Mineral Reserves. United States readers are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists, or is economically or legally mineable. The scientific and technical information related to the operations and exploration discussed in this presentation has been reviewed and approved by Salvador Garcia, B.Eng., a Qualified Person as defined under National Instrument 43-101.

Explorer and Producer

Starcore is a dynamic leader in gold and silver production, with strategically positioned assets spanning Mexico, Canada, and West Africa. Our Management team blends operational and country expertise with capital markets knowledge to drive sustained growth and shareholder value.

San Martin Mine
La Tortilla Project

3 Revenue Streams

STRONG TEAM

Management & Directors

Gary Arca

CFO & DIRECTOR

45+ years CPA experience specializing in public company governance & compliance

Direct oversight of corporate regulatory affairs and daily mine financial operations

Robert Eadie

CEO, PRESIDENT & DIRECTOR

\$100M+ fundraising track record with global network across Europe, NA & Asia

Proven catalyst behind successful resource company start-ups with sustainable growth focus

Jordan Estra

DIRECTOR

40+ years finance/strategic planning, investment banking research analyst background

Active CEO of gold mining operations in Brazil, holds multiple securities licenses

Salvador Garcia

COO & DIRECTOR

39 years Mexico mining experience, former First Majestic & Goldcorp executive

Led development/operations of major mines: Los Filos, Peñasquito, El Sauzal, Tayoltita

Federico Villaseñor

DIRECTOR

40 years with tier-1 operators: Peñoles, Grupo Mexico, Goldcorp

Mining Engineering/Metallurgy degree, Columbia MS, finance credentials

GOLD

SILVER

San Martin Mine

Steady, Disciplined Production with Excellent Infrastructure and Location

OPERATION

Since 1993 at 350tpd and currently operates at 650tpd

LOCATION

50 km east of the City of Querétaro in Querétaro State, and about 250km northwest of Mexico City

SIZE

13,077 hectares

ACQUIRED

February of 2008 from Goldcorp

DEPOSIT

Epithermal, probably high sulphidation precious metal (Ag-Au) type (metal ratio Au:Ag at 1:10), related to a Tertiary dacitic/andesitic intrusive dome.

EXPLORATION

Two underground and one surface drill rigs. Targets of approximately 10,000 meters of underground development and exploration drilling annually.

San Martin Mine

Starcore’s principal asset is the San Martin mine which has been producing for over 20 years. The San Martin milling complex allows the company to process oxide ore and, additionally, to process high-grade carbonaceous ore through a CIL circuit which supports management’s disciplined approach to growth.

Metric	2026	2027	2028	2029	2030	2031	Total
Net Cashflow USD \$000's, \$3500/oz Au; \$50/oz Ag	\$22,987	\$27,216	\$26,749	\$26,264	\$25,760	\$35,628	\$164,604

SILVER

La Tortilla Project

High-Grade Silver, Past Producing Mine

THE OPPORTUNITY

This project is located 40 km from the San Martin Mill complex and the geological setting suggests the current operations have only accessed a portion of the district's mineralization potential.

HISTORY

Historical mine with artisanal legacy (since 1557)

OPPORTUNITY

Multiple structure system, open at depth, high grade silver consistency

LOCATION

150 km from Queretaro, 40 km from San Martin Mill, 5 km from La Negra

LAND PACKAGE

6 mineral claims, 2 properties under 10-year lease (2% NSR, US2M buyout option)

METALLURGY

85% Ag recovery, 80% Au recovery (CIL) * see press release July 14, 2025

GRADE

Au 0.54–0.95 g/t, Ag 590 – 1,200 g/t, avg 51.2 meters with evidence of avg for 5m thickness

La Tortilla Project

Section Overview

Two Main Zones Open at Depth

The main economic structure strikes 80°NW with 30° dip, extending 450m x 600m with variable thickness up to 5+ meters, plus a smaller parallel structure (80m x 30m). Significant exploration upside exists as current mine workings remain far from the projected El Doctor Thrust, suggesting potential for additional parallel mineralized structures in this proven geological setting.

	Ag	Au
SJN-1	562	1.20
SJN-2	550	0.44

La Tortilla Project

Metallurgical Analysis

Salvador Garcia, BEng, a director of the company and chief operating officer, is the company's qualified person on the project as required under National Instrument 43-101 and has prepared the technical information.

(Press release July 14, 2025)

The head grade shows exceptional silver content (968.33 g/t) with moderate gold values (2.15 g/t), indicating a silver-dominant polymetallic deposit with significant economic potential.

The San Martin milling complex can effectively process material through their CIL circuit.*

Sample Grades

	Au (g/ton)	Ag (g/ton)	Cu (%)	Pb (%)	Zn (%)	Se (%)	Fe (%)
Grade	2.15	968.33	0.01	0.41	0.13	0.48	5.59

Time Period	Standard Leaching + Granular Activated Carbon		Standard Leaching Ore Extraction	
	Au Recovery (%)	Ag Recovery (%)	Au Recovery (%)	Ag Recovery (%)
24 hours	74.29	78.83	52.42	72.76
48 hours	77.80	82.57	54.84	76.21
72 hours	79.85	84.75	56.25	78.23

La Tortilla Project

Strategic Silver Growth

La Tortilla's
550 g/t Ag
Advantage

*based on grades of 550 g/t Ag @75% recovery 0.44 g/t Au @ 70% recovery on 100 tpd initial production increasing to 200 tpd in 2027

Disclaimer: Preliminary estimates only; subject to further validation

The San Martin Milling complex recently installed a CIL circuit showing favourable results from existing carbonaceous ore. The high-grade silver ore from La Tortilla can be processed comfortably without interrupting current mining operations and leverages additional cashflow during historic silver highs.

Metric	2026	2027	2028	2029	2030	2031	Total
Net Cashflow USD \$000's, \$3500/oz Au; \$50/oz Ag	\$6,407	\$26,047	\$25,821	\$25,588	\$25,349	\$25,040	\$134,252

A Rare Opportunity

HIGH-GRADE SILVER, PAST PRODUCING MINE

Clear path to valuation re-rating

Fast track mining
with strong cash flow potential

Low-cost entry, lease structure
minimizes risk, nearby milling infrastructure with proven metallurgy

Exposure to high-grade silver
at record prices on top of an existing production profile

Experienced Mexico-based team
with track record of operational success and capital allocation discipline

Driving Growth

LA TORTILLA + SAN MARTIN

\$299M

Cash Flow from
La Tortilla + San Martin

Metric	2026	2027	2028	2029	2030	2031	Total
Net Cashflow USD \$000's, \$3500/oz Au; \$50/oz Ag	\$29,395	\$53,263	\$52,570	\$51,852	\$51,109	\$60,667	\$298,856

Metal	2026	2027	2028	2029	2030	2031	Total
Gold (AuEq oz)	24,917	37,978	37,972	37,965	37,960	44,698	221,490
Silver (Ag oz) Gold:Silver 1:70	1,744,216	2,658,451	2,658,012	2,657,578	2,657,148	3,128,882	15,504,287

The potential future cashflows of adding La Tortilla creates an excellent opportunity to leverage existing infrastructure, regional mining knowledge and management expertise. Starcore has been disciplined in its approach to asset purchases but La tortilla represents a unique opportunity.
